

SHOT TRACER EVENT

AUTONOMOUS MEDIA GENERATION SOLUTION

We are excited to introduce Shot Tracer Event. An iPhone based automated golf shot recording, tracing and sharing solution.

Simply place Shot Tracer Event on any tee box on the golf course and it will automatically record every individual golf shot.

Each golf shot video is saved to the device.

Optionally each saved video is uploaded to the Shot Tracer cloud server (internet connection required via WiFi or SIM) where the ball flight is traced. The video with the traced ball flight is then saved to an online cloud based gallery.

The online gallery can be accessed via a link. Videos can be viewed and downloaded from the online gallery.

Shot Tracer Event is an iPhone based solution.

iPhones have some of the best cameras and number crunching computer systems on the market. Therefore there was no point to re-invent the wheel rather adopt one of the worlds best video recording technologies and connect the dots. Hence Shot Tracer Event, an iPhone based autonomous well-protected golf shot recording, tracing and sharing solution.

Supported iPhones:

iPhone 11 Pro, iPhone 11 Pro Max, iPhone 11, iPhone XS Max, iPhone XR iPhone, X iPhone 8

FEATURES

SHOT TRACER

Shot Tracer Event auto records each golf shot on the tee box. The videos are then sent to the Shot Tracer cloud server. Here the ball flight in each video is traced. In addition the ball speed, apex and distance can be derived from the video and displayed in the traced video. Plus a custom logo may be displayed in the video. Each video is saved in an online gallery which can easily be accessed by each golfer via a link.

- BALL FLIGHT TRACING
- BALL SEED
- APEX FLIGHT HEIGHT
- DISTANCE
- SPONSOR LOGO

MULTI TRACER - KING OF THE HOLE

Adds bragging rights to your Shot Tracer video. Compare ball flight trajectories and distance of each flight partners shot. Want to know who hit the longest drive on the hole from your group, “King of the hole” makes this possible.

SWING PICTURES

Each golfer not only receives a Shot Tracer video but also 3 pictures of their golf swing.

- Top of the swing
- Impact
- Finish

Photos are uploaded along with the video into the online gallery for each golf shot.

REAL TIME DATA

WEB BASED DATA AND SECURITY ANALYTICS

Keep an eye on the progress. Collect vital data from Shot Tracer Event and view the data on any device.

Simply log into our web based reporting tool by entering the unique device ID and take a deep dive into the analytics.

If for some reason Shot Tracer Event is moved the admin receives an instant notification per email or sms.

- Real-time location information.
- Offline/ Online status report.
- Device Battery level.
- Recorded videos counter.
- Theft protection.

CLOUD BASED GALLERY

VIEW AND DOWNLOAD VIDEOS FROM THE CLOUD

Shot Tracer Event automatically starts recording a video once the golfer starts the back swing and stops recording when the ball lands.

The video file is then saved to the iPhone's camera roll gallery. Optionally each video can be uploaded to our cloud service.

An internet connection via WiFi or SIM is necessary to upload videos. This can be done in real time on the golf course via a SIM or at the end of the day once the iPhone is connected to WiFi again.

When connected to the internet, videos are uploaded to Shot Tracer cloud service. From there the ball flight in each video is automatically traced, flight parameters added swing pictures recorded and saved to your custom cloud video gallery.

You can then share the link to this gallery from which videos can be viewed and downloaded.

Videos are sorted into folders by date and tee time. Therefore easy to access and share with customers.

SOFTWARE PLANS

Video Package €89,99 /Month	Video + Tracer Package €179,99 /Month
Unlimited video recordings	Unlimited video recordings
Unlimited uploads to server	Unlimited uploads to server
30GB storage on server	30GB storage on server
Online video gallery	Online video gallery
	Unlimited ball flight tracers

HARDWARE PACKAGES

€199,99 Euros

*Price excluding
VAT, shipping and iPhone.*

Shot Tracer Case including iPhone 8 128GB

€599,99 Euros

Price excluding VAT, shipping

WHATS INCLUDED

Shot Tracer Housing

Carbon Fiber Tripod by ESDDI for a light weight and sturdy Shot Tracer Camera set up.

Ideal Tripod clamp for attaching the Shot Tracer Camera housing tight and secure.

Anker PowerCore 20100mAh to keep the camera running for over a day. Inserted in the bottom part of the Shot Tracer Camera housing and charges the phone and the cooling vents the entire day.

We recommend the Manfrotto iPhone clamp due to the build quality. Perfectly fits into the Shot Tracer Camera housing enclosure.

For very hot days we highly recommend to attach the optional AC Infinity cooling fan into the specifically designed housing frame holders. The fan is also powered by the USB power bank.

A short high quality lightning USB charging cable. It reduces cable mess and keeps the cable from ripping.
